

BioStim BioPill®

FOR USE IN GREASE INTERCEPTORS

ADVANTAGES:

The multi-strains of microbes contained in BioStim's BioPill® are designed to digest fats, oils, grease, starches, and sugars. Our BioPill® is highly concentrated and timed release. It is to be used in indoor grease interceptors with heavy deposits of organic waste. It is not sensitive to wide temperature variations.

BIO FRIENDLY

NON-PATHOGENIC
NO CHEMICALS, ENZYMES OR SURFACTANTS
100% MICROBIAL
NON-CORROSIVE
NON-FLAMMABLE
NON-TOXIC

USAGE

INTERCEPTOR

While wearing gloves for hygiene, remove lid from indoor grease interceptor.
Remove screen and dispose of any debris on screen, then replace screen.
Remove BioPill® from packaging, drop onto screen in interceptor as far away from outlet as possible.
Replace lid to indoor grease interceptor.
The BioPill® is a time release product and should be used on a monthly basis.

Environmentally safe formulations have always been a priority with BioStim. Our bioremediation services are performed with 100% non-pathogenic BioStim microbial products.
