

KB4-F DRAIN LINE FORMULA

FOR USE IN DRAIN LINES

ADVANTAGES:

The multi-strains of microbes contained in BioStim's KB4-F freeze dried powders are designed to digest fats, oils, grease, starches, and sugars. These organics are the primary cause of buildup in drain lines. KB4-F is designed to greatly reduce or eliminate odors, grease and organic buildup in drainage lines. Organic buildup also is necessary for the breeding of drain flies and other insects; KB4-F eliminates this buildup.

BIO FRIENDLY

NON-CAUSTIC
NON-PATHOGENIC
NO CHEMICALS, ENZYMES OR SURFACTANTS
100% MICROBIAL
NON- CORROSIVE
NON-FLAMMABLE
NON-TOXIC
SAFE TO USE IN ANY DRAIN

USAGE

Mix with two gallons water in a 2 gallon sprayer.
Spray 2 to 3 ounces per soda fountain type drain.
Spray 8 ounces per floor drain.
Calibrate pump at full pressure to determine how many seconds to spray; maintain full pressure during use.
Repeat monthly.

Environmentally safe formulations have always been a priority with BioStim. Our bioremediation services are performed with 100% non-pathogenic BioStim microbial products.
