KBMD MICRODRIP™

(Patent Pending)

For use in food service facility drain lines, professionally serviced residential drain lines, and other appropriate drain lines. The *MicroDrip* injects one dose every 15 minutes to provide a consistent microbial coating of the treated drain line to maximize microbial effectiveness.

For use with the *MicroDrip Dispenser* (dispenser is 4 3/4" wide x 8 1/2" high x 3 1/2" deep)

Application Instructions:

Fill *MicroDrip* refill cartridge. (DO NOT add water until ready to install: cartridge will leak). Remove adhesive tab from top of cartridge. Fill with tepid tap water. Replace adhesive tab. Gently shake cartridge to dissolve microbial formula. Turn dispenser ON/OFF switch to OFF. Place the cartridge into the dispenser. Turn dispenser ON/OFF switch to ON. As with all injection systems it is recommended that the tubing be monitored for buildup and replaced as needed. Replace cartridge monthly.

Storage:

Store at ambient temperature, do not allow to freeze. Empty cartridges should be disposed of in garbage receptacle.

Product Information:

Environmentally friendly
Safe for plumbing lines and septic systems
Contains no corrosive or caustic chemicals
No added enzymes or FOG emulsifiers

Non-flammable
Does not cause pass-through
Non-genetically engineered environmental bacteria

Precautions:

Do not ingest
Keep out of reach of children
Avoid contact with open wounds
People with autoimmune deficiencies should avoid contact

Do not inhale
Wear latex gloves for hygiene
Avoid contact with eyes, nose, or mouth
Wash hands with soap and water after handling

First Aid:
